EXPERIENCE

Athlinks, Louisville, CO – *UX Engineer*

September 2016 - current

A technology company focused on endurance racing. On the UX team, doing about 50% front-end development in React, and about 50% design and research, working with multiple teams.

Technology: React.js, ES6(Babel + Webpack), Sass, SVG, AWS

Tools: Sketch, Adobe Suite, Invision, Git, Version One

Sequence, San Francisco, CA— *Front-End Web Developer*

June 2015 - May 2016

High-profile design agency. **Clients I touched**: Chipotle, Chevron, Medtronic, Facebook. **Other clients**: Apple, Nest, Juicero, NerdWallet.

Technology: Angular.js, React.js, jQuery, Gulp, Browserify, Sass, PWA, AWS

Tools: Adobe Suite, Jira, Git,

Viscira, San Francisco, CA— *Associate Web Developer*

June 2014 - May 2015

Agency focused on pharmaceutical and biotech clients. **Clients I touched**: Alexion, Sunovion, Ariad. **Other clients**: Genentech, Amgen, Johnson & Johnson.

Technology: Sass/Less, jQuery

Tools: Adobe Suite

PROJECTS

TastyMade — *Website for burger chain*

www.TastyMade.com – A simple, single page site using some heavy scroll animation and Google Maps API. Built alone as a contract.

SketchUp Team App— *Web app about company*

(Not launched, but in my github: github.com/jdalton308/icebreaker) – An interactive, fun, parallax page that shows off the company and culture. Used GSAP and just jQuery. Built alone on contract.

SKILLS & TOOLS

HTML5

CSS3: SASS/LESS

JavaScript: ES6, Angular, React, jQuery, GSAP, Node.js, Gulp, Webpack/Browserify

PHP: Wordpress, Joomla

APIs: Google Maps, Firebase

Adobe Suite: Photoshop, Illustrator, InDesign, After Effects

Sketch

Responsive Web Design

HTML Emails

Amazon Web Services

Git

Agile Tools: Jira, VersionOne

Google Analytics

Search Engine Optimization

EDUCATION

M.S. Stem Cell Biology
University of Minnesota
2010-2012

B.S. Biology
Ferris State University
2007 - 2010

Guac Hunter — *Progressive web app for Chipotle*

www.GuacHunter.com - An interactive, find-the-difference game for Chipotle, used to give away free food. Built with only jQuery with multiple 3rd-party APIs.

Pizzeria Locale — *Website for Chipotle-owned pizza shop*

www.PizzeriaLocale.com - Built for Chipotle's custom CMS (on Rails), and involved some parallax-effect and responsive challenges.

Techron— *Microsite for Chevron's Techron product*

www.Techron.com - A (basically) single-page site to promote the fuel additive Techron. I worked with the designer to figure out how to present the videos, and was given liberties on most of the animations.

ShopHouse Kitchen Riddle — *Web-app riddle game*

shophouseriddle.joedalton.io - Built on Angular.js, a short-term promotional riddle game, with new riddles daily.
